Overview

Truss Library Desk is made from Baltic birch plywood with a choice of laminate color (white, red, moss gray, espresso brown or custom colors). The desk has a truss element at the base and cutouts that lend an airy feeling. It's whimsical, it's highly visual and it has a punchy graphic quality to it while bringing a very functional component to the design. With the added library shelf for secondary surface and built in book shelf along the backside, the desk provides a lot of storage options for how you want manage your work needs. The desk is packaged and shipped out flat, and assembled them with minimum fuss using just a mallet and an Allen wrench.
